

| ITE315 | Database Systems | L | T | P | C |
|--|---|---|---|---|---|
| | | 3 | 0 | 0 | 3 |
| Prerequisite | | | | | |
| Objectives | <ul style="list-style-type: none"> To teach role of data, files and databases in information systems. To impart knowledge of data modeling techniques. To provide the fundamentals of front-end and back-end of databases | | | | |
| Outcomes | <p>The students will be able to</p> <ul style="list-style-type: none"> Understand fundamental concepts of database management system, database modeling, design, SQL, PL/SQL, and system implementation techniques. Model and implement database applications Understand transaction processing of Databases | | | | |
| Unit I | DATABASE SYSTEMS History and motivation for database systems; components of database systems; DBMS functions; database architecture and data independence. | | | | |
| Unit II | DATA MODELING Data modeling; conceptual models; object-oriented model; relational data model; Database query languages: Overview of database languages; SQL; query optimization; 4th-generation environments; embedding non-procedural queries in a procedural language; introduction to Object Query Language. | | | | |
| Unit III | RELATIONAL DATABASES Mapping conceptual schema to a relational schema; entity and referential integrity; relational algebra and relational calculus; Relational database design: Database design; functional dependency; normal forms; multivalued dependency; join dependency; representation theory. | | | | |
| Unit IV | TRANSACTION PROCESSING Transactions; failure and recovery; concurrency control | | | | |
| Unit V | PHYSICAL DATABASE DESIGN Storage and file structure; indexed files; hashed files; signature files; b-trees; files with dense index; files with variable length records; database efficiency and tuning. | | | | |
| Text Books | <ol style="list-style-type: none"> A. Silberschatz, H. F. Korth & S. Sudershan, Database system concepts, McGraw Hill, 4th Edition 2002. R. Elmasri & S. B. Navathe, Fundamentals of database systems, Addison Wesley, 2005. C. J. Date, An introduction to database systems, Addison Wesley, 2003. H. Garcia et al., Database system implementation, Prentice Hall | | | | |
